Commissioning Service report from Malaysia - Fish Can Processing Plant

AMCON INC. (Japan) has recently finished commissioning work in Penang, Malaysia. The user is called "Protigam Food Industry Sdn Bhd", fish can processing factory with long history in Malaysia.

Until the installation of Volute® Dewatering Press, this factory had used Filter press, which caused extremely troublesome and hateful daily works of removing sludge from filter clothes and washing filter clothes as its sludge is really oily DAF sludge.

Since there was time lag after installation till commissioning service, the objective sludge had been digested well in the clarifier/storage tank. However, wide range of application of Volute never minded such a "minor" change of sludge.

Relatively wide application range of Volute can realize stable performance, even if unstable operation of WwTP is happened to be observed!!

Please check the detail [here](#).
