June 2015 / Vol.78

Smallest ES-051 Commissioned at Carton Factory in South East Asia

AMCON INC. (Japan) has just finished start-up service for the smallest model ES-051 in South East Asia this June. The user is a carton factory and the sludge is a completely chemical sludge. The operator is now satisfied with Volute for its continuous and stable

operation. The operation data is shown below.
Please confirm!

<Given condition>

Sludge type: Chemically precipitated sludge
Sludge concentration SS: 18,000 mg/L

<Result>

Model: ES-051
Standard capacity: up to 1 kgDS/h
DS throughput: 1.66 kgDS/h
Dewatered sludge cake solid content: 27.6%
Solids capture rate: 99.1%

VOD-KA Exhibition, Prague, Czech Republic, 19.-21.5.2015

- **Biggest waste water and environmental exhibition in Czech Republic**
- **3 Volute machines displayed**

PRAGUE, Czech Republic – Amcon Europe has been exhibiting for the second time at the VOD-KA Exhibition in Prague and we are glad that this year we saw more visitors to our stand.

The VOD-KA exhibition is an event aimed at water supply and sewage and technologies and services in this field.

This year we had a 50m stand with a new design that wowed our visitors, with this much space we were able to display 3 different sizes of unit and show off our broad range of sludge dewatering units.

In the field of sludge dewatering in the Czech Republic is VOLUTE, the self-cleaning sludge treatment technology with low operational costs and easy maintenance is still quite revolutionary.

ES-051 – the smallest dewatering machine in the world, one that attracted the attention of many visitors. It is suitable for small waste water treatment plants with PE 50 to 500.

EC-201 – a model from this year's newest EC series, where a conditioning tank has been added in order to reach the highest quality of filtrate after dewatering. It rightfully earned the enthusiasm of visitors and offers for immediate purchase during the event. The PE of this model is 3000 to 6000.

ES-351 – The model with the highest cylinder diameter (350mm) in our supply. It is suitable for average to large waste water treatment plants with PE up to 30 000 and it is also suitable for industrial WWTPs with a higher concentration of oil in the sludge, thanks to its self-cleaning construction.

We are very satisfied with this year's VOD-KA Exhibition and we are already looking forward to next year!

Many thanks to all our visitors, we are looking forward to our future cooperation.

AMCON Europe recently joined the world of social media.

You can find us on google+

<https://plus.google.com/+Amcon-eu/posts>

also on twitter

[@VoluteEsSeries](https://twitter.com/VoluteEsSeries)

Please come join us to be kept up to date with all the latest news and events and even a little of fun is being reported.

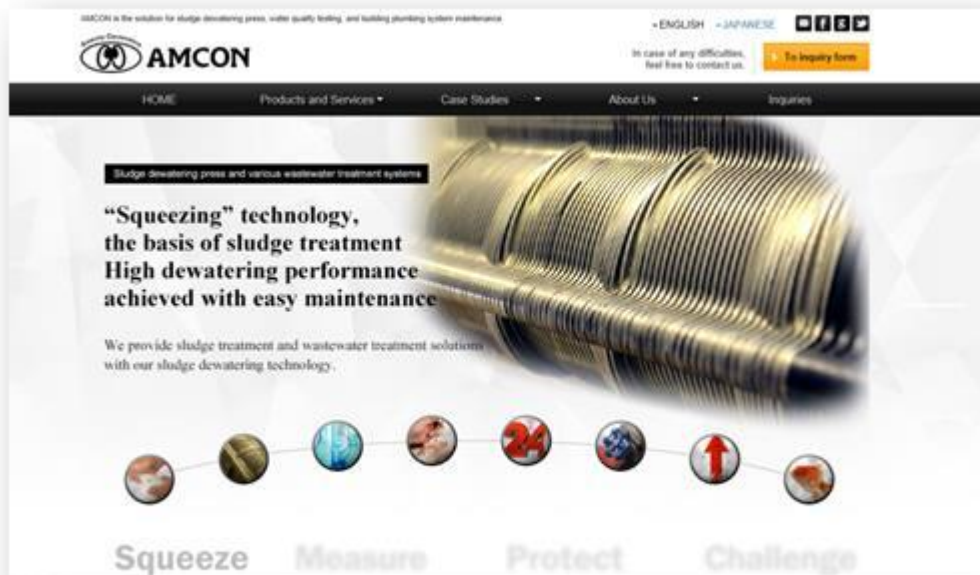

Volute's next outing will be at UK AD&BIOGAS exhibition in Birmingham NEC.

This is a field that Volute is becoming more prevalent in and one that is growing in size, with our cost saving benefits plus the fact the operators are making much from biogas production this is leading to Volute becoming the go to technology.

See you there!
